

# *The Pacific Sunrooms Story*

*-Our Roots Are In The Sunroom And Patio Cover Business.*

*-We Asked Ourselves... Could We Could Design And Build a Better, More Affordable System?*

*After Researching All The Products On The Market,  
The Answer Was Yes! We Could.*

**A Good looking, Fully Engineered System at an  
Extremely Attractive Price!**

*Let us take you on a short tour and show  
you what's available on the market today.*

# Benefits of a Sunroom

## OUTDOOR LIVING INDOORS

- Free from elements (bugs, wind, rain, etc.)
- Enjoy sunshine, rain, view (what nature has to offer)
- Extend the outdoor season

## INCREASED LIVING SPACE

- In a casual atmosphere
- Backyard Privacy
- Use as a spa enclosure, art studio, workshop

## INCREASED PROPERTY VALUE

- Becomes highlight of house
- No maintenance
- No extra costs

Privacy from the outside

Relaxation from the inside

## *Activities are endless in a Sunroom*

**Imagine having a quiet intimate dinner for the two of you, or perhaps a gathering of family and friends, or even a party with all of your envious neighbors.**

**Enjoy a hobby in the serenity of your solarium, or relax and watch some television, or maybe start that novel you've been wanting to read.**

**A Great place to play with your children or grandchildren on a rainy day.**

Maybe Just RELAX  
and soak in your hot  
tub after a long day.

Gaze out at the  
moon on those quiet  
special evenings.

**The possibilities are endless  
in a Sunroom from Pacific Sunrooms**

# Technically Speaking

## *The Rafter System and Structural Components*

- **All structural components are extruded. This includes:**  
mounting track, T plugs, rafters, stiffener bars, angles and all other Structural Components.
- **All fastening hardware is stainless steel.**
- **All aluminum components are finished in gleaming Arctic White baked enamel, or commercial brown.**

## *The Gaskets and Sealing System*

- **All Gasketing materials are formed from natural rubber material, which is virtually impervious to UV rays from the sun. Our products employ a double seal system, so that you won't worry about leaks.**
- **All fastening hardware on the outside of the rafters are neatly concealed with our unique cover system.**
- **All of our products are engineered for all North American snow loads.**

# How we Design Your Solarium

First, a factory trained representative will survey your site.

Second, all materials are cut and custom designed for your home.

Next, our factory trained installers begin to assemble your dream

# The Finishing Touches

Our crew puts up any windows and doors to create proper ventilation

Any finishing work that needs to be done is completed and finally....

Your Sunroom is complete and ready for use!
